The Left-Over! app

#CTISProjects

2021-2022

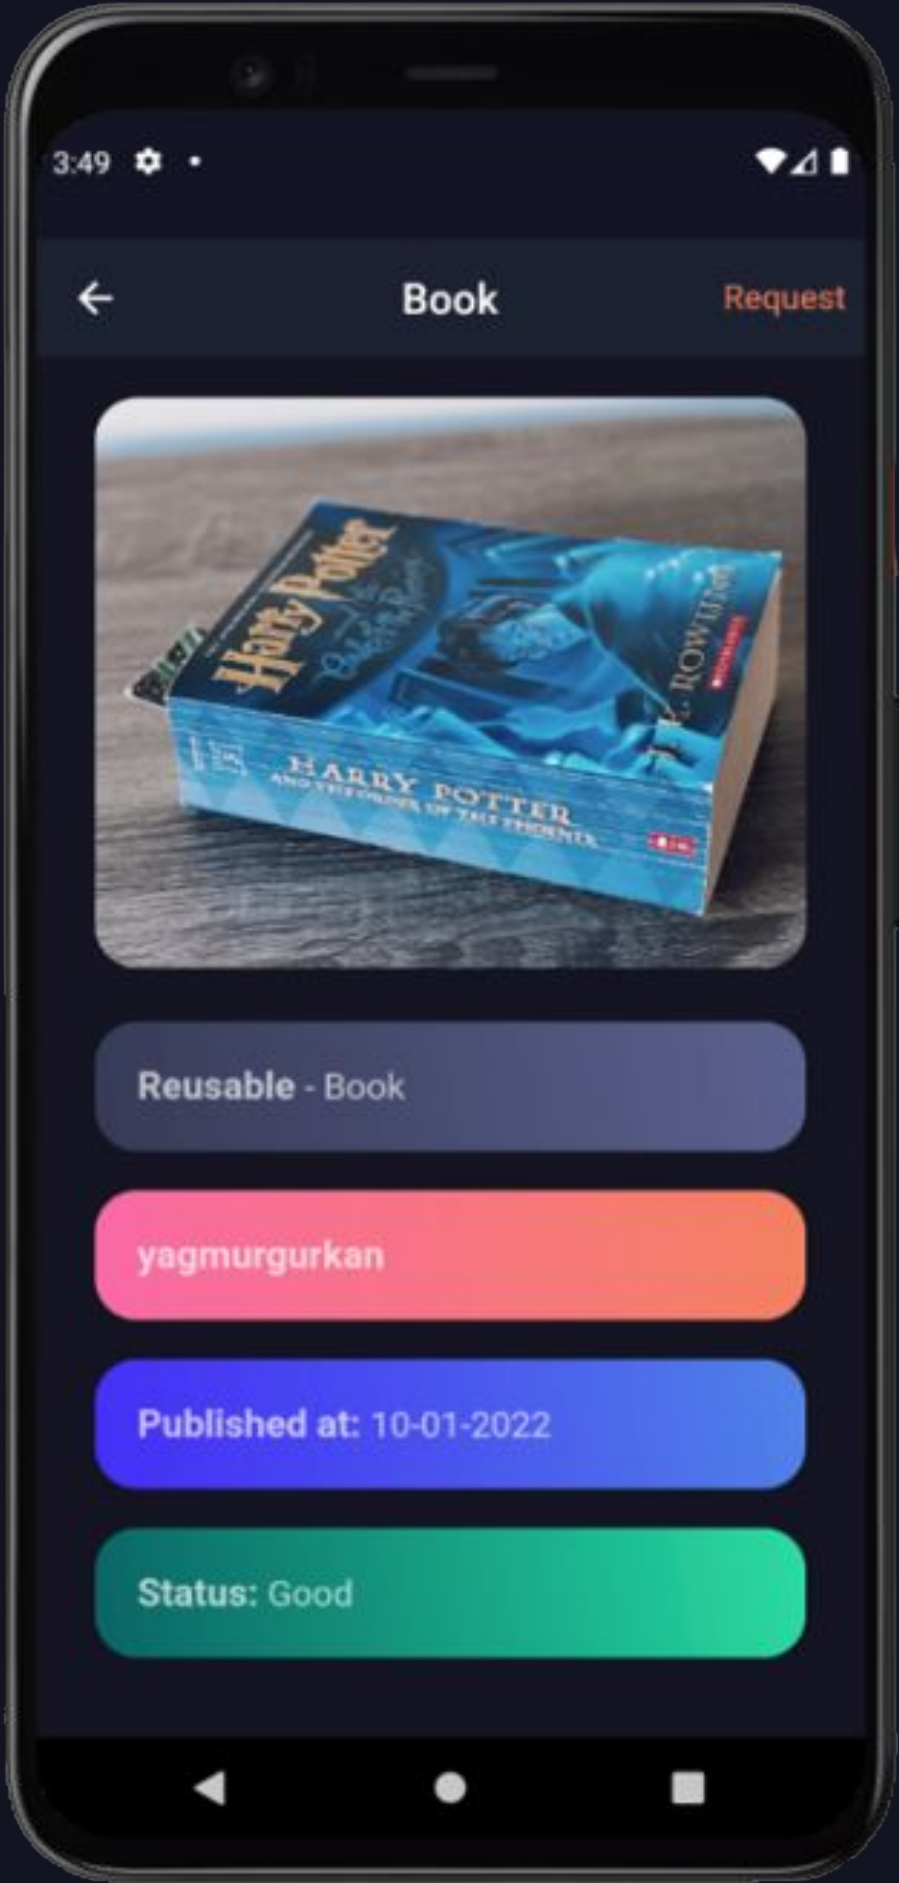

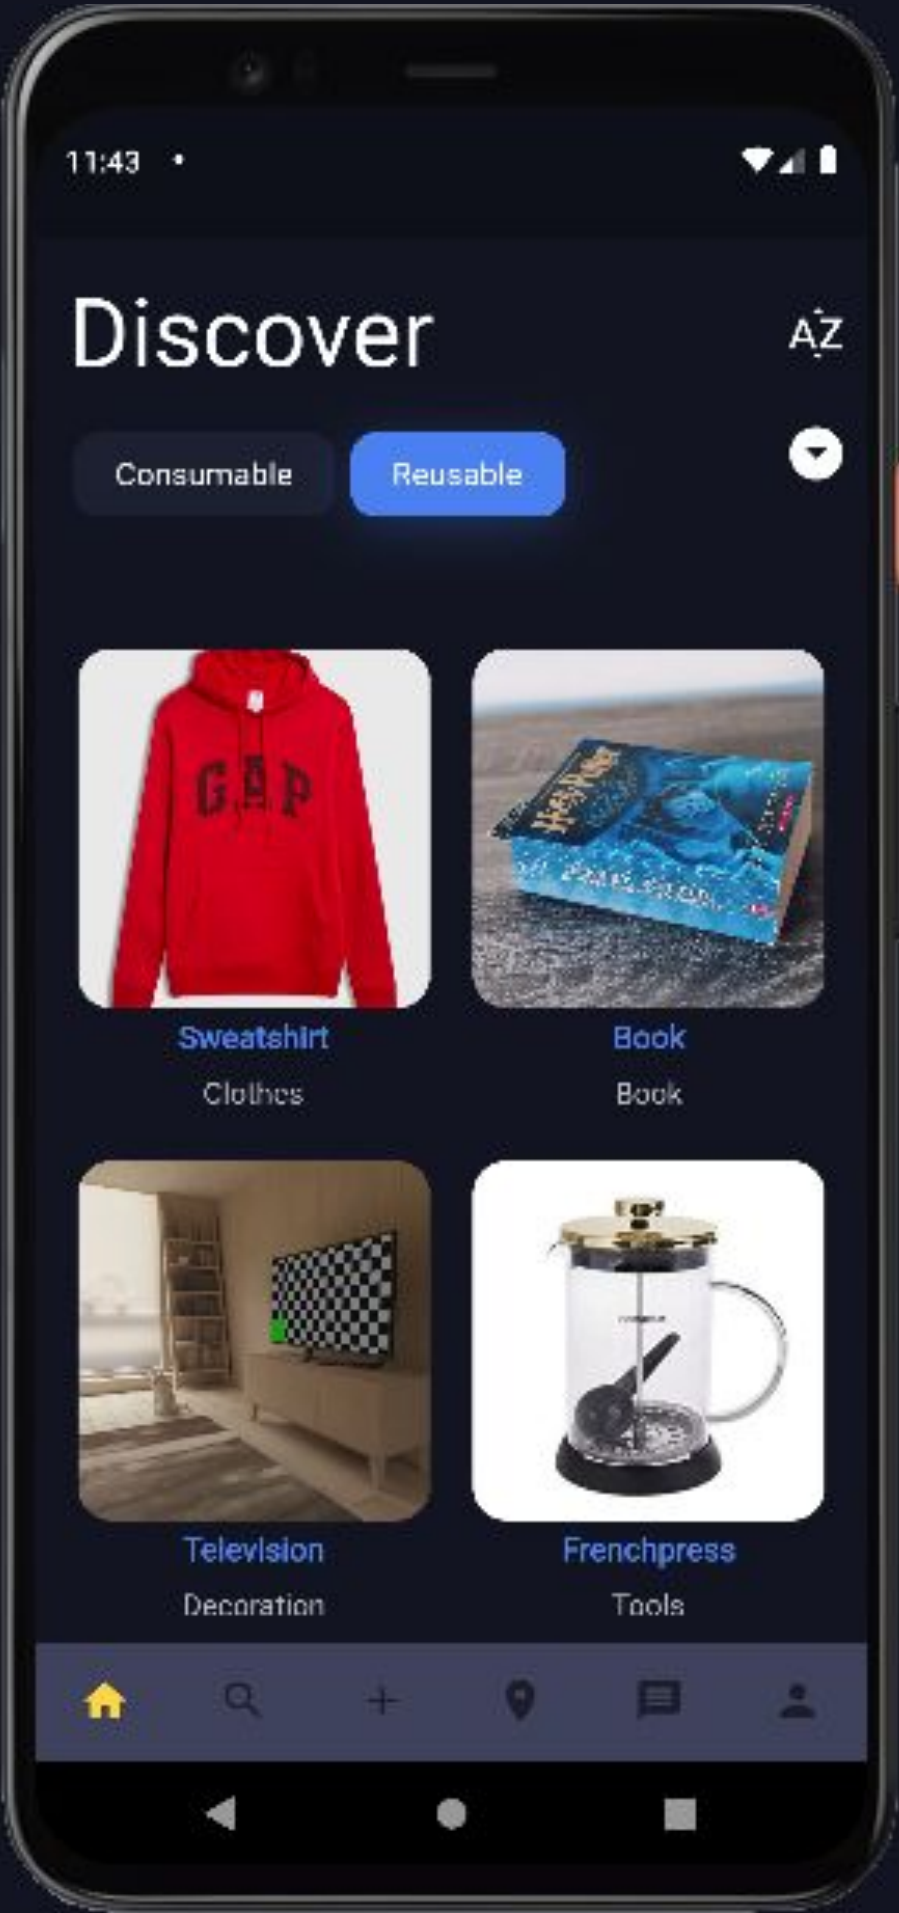

The Left-Over! app is a mobile application that provides a sharing platform to make use of any kind of idle goods without price. There are three categories which are reusable, consumable and collectable. In order to enhance sustainability and increase recycling.

- Display consumable and reusable items
- Add and remove item
- View item details
- Request an item
- Messaging between sharer and recipient
- Display the closest drop points on the map
